PROJECTS

Fashion or Clothing Store Website [↗](#)

Developed a responsive Fashion Website using HTML and CSS with media queries. The site features visually captivating pages showcasing Fashion & Clothing, user login form, Showing a cloath for man's wear,kids & ledias, and detailed information about Cloathing. Focused on creating an intuitive and engaging user experience without using backend or database technologies.

Myntra Clone E-Commerce Website [↗](#)

The Myntra Clone e-commerce website, built with HTML, CSS, and JavaScript, features a responsive homepage, product listings, shopping cart, and checkout page. Users can browse products, add them to the cart, and view the total price, with localStorage used to persist cart data across sessions.

Recipe Finder App [↗](#)

The Recipe Finder App built with React.js allows users to search for recipes based on available ingredients. It fetches recipe details such as ingredients, instructions, and cooking times from an API. The app features filtering options, saving favorites, and a responsive, interactive design.
